Period: 2026-06-01 - 2026-06-30

Summary

Customer	Project	Duration
MH EMS	MH EMS	25:10 h
		25:10 h
MP EMS	MP EMS	01:30 h
		01:30 h
Saudi Arabia	Neom	03:40 h
		03:40 h
Spero	Spero	109:10 h
		109:10 h

Full list

Date	Description	Duration
06-25 14:00 06-25 18:30	Spero - Spero - Coding and Development <i>Planned the Care Hub backend by identifying required patient data, APIs, and open-source tools needed for implementation.</i>	04:30 h
06-25 13:00 06-25 13:00	Spero - Spero - Coding and Development <i>Analyzed and evaluated healthcare AI use cases from a government approval, feasibility, and safety perspective, identifying Care Hub as the primary module for implementation.</i>	00:00 h
06-24 14:00 06-24 18:30	Spero - Spero - Coding and Development <i>Coordinated with Shubham for frontend integration and with Yogita for testing and verification of the attachment functionality.</i>	04:30 h
06-24 09:15 06-24 13:00	Spero - Spero - Coding and Development <i>Integrated attachment URLs in the Ticket Chat API to enable direct file access and download from the frontend, and deployed the attachment functionality.</i>	03:45 h
06-23 14:00 06-23 19:30	Spero - Spero - Coding and Development <i>Updated and tested the ticket chat API to return attachments along with chat messages.</i>	05:30 h
06-23 09:10 06-23 13:00	Spero - Spero - Coding and Development <i>Analyzed UVDesk database tables to identify chat and attachment storage. Implemented attachment retrieval logic for ticket conversations.</i>	03:50 h
06-22 14:00 06-22 18:30	Spero - Spero - Coding and Development <i>Performed EMS dataset analysis and worked on analytics, reporting, and UI enhancement planning.</i>	04:30 h
06-22 09:05 06-22 13:00	Spero - Spero - Coding and Development <i>Worked on the EMS Intelligence Dashboard, focusing on frontend development and backend API connectivity.</i>	03:55 h
06-19 14:00 06-19 18:30	Spero - Spero - Coding and Development <i>Developed and enhanced the Project Workload Heatmap Dashboard by implementing workload analytics, filtering features, and performance optimizations.</i>	04:30 h
06-19 09:05 06-19 13:00	Spero - Spero - Coding and Development <i>Updated Project Heatmap API with ticket status-wise breakdown (Open, Pending, Answered, Resolved, Closed), month-wise project ticket aggregation, dynamic date/project filters, project dropdown support, and monthly sorting to display highest ticket-count projects first.</i>	03:55 h
06-18 14:00 06-18 18:30	Spero - Spero - Coding and Development <i>Completed R&D for UVDesk dashboard and police intelligence dashboard, identifying future enhancements like analytics, heatmaps, and operational insights.</i>	04:30 h
06-18 09:05 06-18 13:00	Spero - Spero - Coding and Development <i>Worked on frontend development of the Workload page.</i>	03:55 h
06-17 14:00 06-17 18:30	Spero - Spero - Coding and Development <i>Exploring React.js by building a Dashboard to understand dashboard development, charts, and data visualization.</i>	04:30 h
06-17 09:05 06-17 13:00	MH EMS - MH EMS - Coding and Development <i>Built a Spark ETL pipeline for GIS Analytics by handling and cleaning unknown/others values for cleaner analytics.</i>	03:55 h
06-16 14:00 06-16 18:30	MH EMS - MH EMS - Coding and Development <i>Prepared a structured dataset with event type classification and exported the final output as CSV.</i>	04:30 h
06-16 09:00 06-16 13:00	MH EMS - MH EMS - Coding and Development <i>Built a Spark ETL pipeline for GIS Analytics to process medical incident data with proper cleaning, using records from 2025 onwards, and performing location mapping</i>	04:00 h

Date	Description	Duration
06-15 10:00 06-15 18:30	Spero - Spero - Learning And Development <i>Developing a dashboard using FastAPI for backend services and HTML, CSS, and JavaScript for frontend visualization to present data through interactive and responsive components.</i>	08:30 h
06-12 14:00 06-12 18:30	Spero - Spero - Coding and Development <i>Performed API testing and dashboard data verification to ensure accurate ticket summaries, filter results, and reporting outputs across agents and projects.</i>	04:30 h
06-12 10:30 06-12 13:00	Spero - Spero - Coding and Development <i>Enhanced UVdesk Agent Summary reporting by refining ticket-level data, improving agent-wise metrics, and validating SLA, date, and status-based filtering functionality.</i>	02:30 h
06-11 14:00 06-11 17:00	Spero - Spero - Coding and Development <i>Worked on Updated the UVdesk Agent Summary API by adding ticket details, agent-wise summary, SLA and date filters, and status-based reporting for dashboard analysis.</i>	03:00 h
06-11 09:20 06-11 13:00	Spero - Spero - Coding and Development <i>Updated UVdesk Agent and Project Summary APIs by implementing subgroup-to-project mapping and enhancing project-wise and agent-wise ticket reporting for dashboard analytics.</i>	03:40 h
06-10 14:00 06-10 18:30	Spero - Spero - Coding and Development <i>Deployed the latest backend code changes on the server, performed end-to-end validation, and confirmed that all API endpoints and filtering functionalities are working as expected without any errors.</i>	04:30 h
06-10 09:15 06-10 13:00	Spero - Spero - Coding and Development <i>Updated the Ticket Details API to enable robust status-wise ticket filtering, ensuring accurate retrieval of tickets based on different workflow states, and also fixed multiple data-fetching issues that were causing inconsistencies in the response.</i>	03:45 h
06-09 14:00 06-09 18:30	Spero - Spero - Coding and Development <i>Reviewed and verified dashboard WebSocket counts with database data and resolved issues related to ticket count accuracy.</i>	04:30 h
06-09 09:15 06-09 13:00	Spero - Spero - Coding and Development <i>Updated the Agent Summary API by adding working-day SLA calculation logic (Mon-Fri, max 8 hrs/day), SLA filters, status-wise ticket counts, date filtering, and agent-wise ticket summaries.</i>	03:45 h
06-05 18:30 06-05 18:30	Spero - Spero - Learning And Development <i>Explored HTML and CSS concepts to understand webpage structure, styling, forms, layouts, and other frontend development fundamentals.</i>	00:00 h
06-05 09:10 06-05 13:00	Spero - Spero - Coding and Development <i>Added the enabled filter in the report API and fixed the UVDesk dashboard count issues. Verified the data against the database and ensured the dashboard displays accurate counts.</i>	03:50 h
06-04 14:00 06-04 18:30	Spero - Spero - Learning And Development <i>Explored core HTML concepts such as document structure, text formatting, lists, hyperlinks, images, and tables to build a strong foundation in web development.</i>	04:30 h
06-04 09:20 06-04 13:00	Saudi Arabia - Neom - Coding and Development <i>Validated all API endpoints and WebSocket services in the NEOM repository, ensuring they are operational and performing as intended.</i>	03:40 h
06-03 14:00 06-03 18:30	MH EMS - MH EMS - Coding and Development <i>* Reviewed village GeoJSON data and verified the required fields required for GIS database integration. * Checked and tested the PySpark data loading workflow from GeoJSON to PostgreSQL and validated the data extraction and transformation process.</i>	04:30 h
06-03 09:20 06-03 13:00	Spero - Spero - Coding and Development <i>Performed a detailed comparison of UV Desk dashboard and report data against database records to validate counts, reports, and overall data consistency.</i>	03:40 h

Date	Description	Duration
06-02 17:00 06-02 18:30	MP EMS - MP EMS - Documentation <i>Prepared PPT content by summarizing dashboard features, key metrics, and operational insights for monitoring and reporting purposes.</i>	01:30 h
06-02 14:00 06-02 17:00	Spero - Spero - Coding and Development <i>Currently cross-checking the UVDesk portal dashboard counts with the database and working on fixing mismatched ticket counts .</i>	03:00 h
06-02 09:15 06-02 13:00	MH EMS - MH EMS - Coding and Development <i>* Developed a PySpark pipeline to extract village demographic and geographic data from GeoJSON files and load it into PostgreSQL for GIS analytics. * Implemented data extraction, filtering, and PostgreSQL integration to support GIS analytics and dashboard visualization.</i>	03:45 h
06-01 14:00 06-01 18:30	MH EMS - MH EMS - Coding and Development <i>Improved ETL performance by filtering and processing only relevant Road Traffic Accident (RTA) data, reducing overall data volume. Optimized server load and resource utilization by limiting data ingestion to required records for GIS analytics.</i>	04:30 h
06-01 09:20 06-01 13:00	Spero - Spero - Coding and Development <i>Updated the Agent Summary GET API by adding overall dashboard counts for Total Agents, Open, Pending, Answered, Resolved, Closed, Active, and Total Tickets to support dashboard summary cards. Updated the Agent-wise Ticket Details POST API by implementing Agent ID-based filtering along with existing date range and SLA-based filters (<48 hrs / >48 hrs), enabling more detailed and targeted ticket analysis.</i>	03:40 h
		139:30 h
